

RE: MB Docket No. 15-149

Tom Wheeler
Chairman
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Chairman Wheeler,

The Round Rock Chamber supports the merger of Charter Communications, Time Warner Cable and Bright House Networks into New Charter. We ask the Federal Communications Commission to approve this merger, which would help create jobs and increase internet access in the United States.

Round Rock, Texas, is the second fastest-growing city in the United States, attracting new businesses and residents on a daily basis. People are drawn to our community by jobs and economic opportunity. Therefore, it is encouraging to know that New Charter is planning to create thousands of new jobs by hiring for customer call centers and field technician operations in the United States. Some of these jobs are going to be replacing outsourced call center jobs that had been moved overseas by Time Warner.

In addition, New Charter is committed to principles that would ensure its customers have access to a fair, transparent, and open Internet. The company has said it will provide uniform national pricing without data caps, modem fees, early termination fees, or usage-based pricing. It will also not engage in paid prioritization.

It is important to support companies that are supporting America's businesses and workforce. New Charter would be such a company. We ask that you approve this merger.

Sincerely,

Mike Odom
President and CEO
Round Rock Chamber
